

INTEGRATED POLICY OF QUALITY, ENVIRONMENT AND OCCUPATIONAL HEALTH, SAFETY (OHS) AND INFORMATION SECURITY

The long-term strategic intent of the organization Lottmann intercontinental technology, further just Lottmann, is to flawlessly meet the requirements and expectations of customers in complying with legislative and other regulations. Our organization puts maximum emphasis on understanding the customer's requirements to ensure all their needs and these needs are filled at the highest possible level. We hope that all customers have confidence in us and like to turn to us with their requirements.

The quality of our products and processes implemented is demonstrated except of others by creating, maintaining and improving the management system according to ČSN EN ISO 9001.

We recognize that employees create values of the organization, therefore we place great emphasis on professional development. In addition to staff with many years of experience in the industry we also employ workers who are at the beginning of his professional career. With this we want to combine experience with new trends. Out of our employees we educate professionals, we organize technical seminars for them, we send them on certified courses and training.

The company management puts great emphasis on compliance with the quality management system. Fulfilling the long-term and short-term goals of quality. Planning and compliance with the financial resources of the organization is essential to have created additional resources for the continued development of the organization.

We pay attention to the maximum use of the latest technology, and therefore, all production processes are monitored by reliable information systems. In particular, we focus on the prevention of environmental pollution and even beyond these requirements and to work safely and minimize risks.

With respect to the nature of our production, management of organization attaches great importance to the commitment of continuous improvement of all processes in accordance with the above standards.
